

Epibiont Monitoring on Shellfish Aquaculture Gear

Protocol ID: dealteris_2004_hb111 · Field datasheet — the columns below mirror the stats workbook's data-entry sheets exactly.

Deployment & site log (one row per gear unit per visit)

Site	Gear unit ID	Season	Date	Observer	Temp (°C)	Salinity (ppt)	DO (mg/L)	Surface area (cm²)	Gear type	Notes

Sessile-epibiont cover (one row per quadrat; % cover by taxonomic group)

Record percentage cover of each group within the fixed quadrat. Columns match the workbook 'Sessile cover' sheet.

Gear unit ID	Quadrat #	Porifera (sponges) %	Hydrozoa (hydroids) %	Bryozoa %	Ascidiacea (tunicates) %	Algae %	Other %

Associated fauna (one row per taxon)

Mobile animals (fish, crustaceans, molluscs > ~5 mm) recovered in the enclosure. Columns match the workbook 'Associated fauna' sheet.

Gear unit ID	Taxon	Group (fish/crust./mollusc)	Count	Mean size (mm)	Notes
